

The National Leiomyosarcoma Foundation - LMS Community Support

The National Leiomyosarcoma Foundation is enhancing our one on one support for patients and caregivers through a formalized collaborative partnership with Imerman Angels, a cancer support nonprofit started in 2006, providing personalized connections which enable one-on-one support to cancer fighters, survivors, and caregivers across the U.S. and around the world, with services in Spanish as well. Services are completely free and available through internet or telephone.

Support is provided to patients, families, and caregivers for unique one on one peer support, which is the sole mission of Imerman Angels, with a database of 12,000 Mentor Angels representing 145 different cancers. They have a dedicated Cance Support Specialist staff, to match Leiomyosarcoma patients for one on one support.

Imerman Angels is unique in that one-on-one peer support is the sole focus of the organization..
